Car Diagnosis App

Josh, Justin, Lily, Alex, Mike
Team: Red Spark

High Level Description

The Car Diagnosis App uses your senses to diagnosis car problems by narrowing them down through Touch, Sound, Smell, Look and if it starts or not. Through this intuitive approach we aim to make diagnosis simpler and less confusing. The Car Diagnosis App is a community based app. That creates real time solutions with users and certified mechanics. Problem solving is all about the conversation which is why we have an integrated upvote and downvote system as well as a reply and commenting system for each proposed solution.
